Acknowledgments

The Special Topics series will focus on research of interest to policy-makers, program administrators, and researchers in the field of drug abuse. The Special Topics series is a free service from CESAR and is supported by funds from Governor Schaefer's Drug and Alcohol Abuse Commission. This report is a verbatim copy of the manuscript submitted to CESAR by the authors and does not necessarily reflect the views of the University of Maryland or the Governor's Commission.

The research described in this report was supported in part by a grant from the Office of Educational Research and Improvement, U.S. Department of Education, and the Center for Research on Effective Schooling for Disadvantaged Students at the Johns Hopkins University. Partial support was also provided by the Charleston County School District in South Carolina. The author would like to thank the following people for their technical support and assistance: the Charleston County DARE officers, and Lois Hybl and Gary Gottfredson at the Johns Hopkins University. The author is also grateful for comments provided by Denise Gottfredson on earlier drafts of this paper.
